

2019 Infrastructure Road Program

Dear Property Owner:

Starting in mid-April, the Village will begin a resurfacing project on various roads throughout the Village. You are in receipt of this notice as this construction may affect your roadway or a roadway adjacent to your property. The project will consist of pavement removal, pavement patching, repair of deteriorated sidewalk, replacement of sidewalk ramps to meet current ADA requirements, curb and gutter removal and replacement, new storm sewer installation, manhole and inlet adjustments, new asphalt pavement, and pavement markings. The Village will also be completing miscellaneous sidewalk removal and replacement and curb and gutter removal and replacement throughout the Village. It is anticipated that the project will be substantially complete by the end of September.

Throughout the duration of the project, lane closures and minor delays should be expected, however no major roadway closures are anticipated. To prepare for the upcoming work, representatives from the Village and Engineering Enterprises, Inc. will be onsite to identify removal limits for various elements of construction.

During construction there will be times when parking on the roadway will not be allowed for curb and gutter replacement, sidewalk replacement and pavement resurfacing operations. During curb and gutter and sidewalk replacement, No Parking signs will be posted directly in front of the area where parking is not allowed. During Pavement resurfacing operations which include the start of pavement milling through the final pavement paving, No Parking signs will be posted for the entire roadway. **If a car is parked in the roadway where No Parking signs are posted, it will be towed at the vehicle owner's expense.**

During construction, if you have any questions or would like to meet with a project representative onsite, please contact Jake Seger of Engineering Enterprises, Inc. at 630/806-6213; additionally, you can call the Village of Montgomery Department of Public Works at 630/896-9241. Your cooperation and patience are greatly appreciated and please remember to exercise additional caution while driving through the construction area.

While the contact information contained in this flyer should be used for non-emergency construction related issues or questions, they are not intended to replace the police emergency number (911) and non-emergency number (630/897-8707), which should still be utilized as appropriate.
